## The evolution of medicine through warfare

From the English Civil War to modern day ‘theatres of war’, military conflict and the advancement of medicine have evolved side by side.

Join us at the Household Cavalry Museum as we delve into the wide reaching impact of these changes and how they affect our lives today; from the development of prosthetics to the changing face of frontline warfare.

### **Museum information:**

From XX 2021 to XX 2022 the Museum will be hosting a trail on artefacts from medicine and conflict and delving into the personal stories...

**More information to follow... on contents, events and key activity dates + walking tours**
